

BIOGAS + (ready-to-use granules)

Biological agent for the treatment of anaerobic digesters (sludge, organic waste, agricultural waste, landfill leachate) to improve the degradation of organic matter and increase biogas production yields (volume and methane content).

Net weight : 10 Kg

Density : 700 g/l

Expiration date : 02.05.2019

Lot N° 180502

**Minimum monthly dosage:
According to our guidelines**

MADEP microorganisms are preserved as spores attached to mineral granules of 0.5 to 1.5 mm.

These granules are not soluble and can be used directly by simply adding to recirculations of the digestates or tanks / basins that feed the anaerobic digester.

Store in a dry room at room temperature and close the bag well after each use.

Wash hands after use.
